

# How To Login

## Using Microsoft Azure Active Directory (AAD) with Okta Single Sign On (SSO)

### 1. Login SPP with AAD & Okta SSO

- Now you can login to SPP by clicking the Sign In button.

#### \*Note:

On **Testing** Server, it will have NTID textbox, to let you enter the specific user NTID and login with that user information on **testing DB for testing purpose**, after successful verified by Okta SSO.

On **Production** Server, it will only have the Sign In button, after you verified by Okta SSO, you will be redirected to SPP Home with your own identity.

2. Enter your company email (\*@jabil.com), after highlight the Password section / tick the checkbox, it will auto redirect to Okta SSO, simply key-in your NTID + password.

**\*For first time user only, after you grant the permission, you will not see this screen again (unless you revoke its permission manually).**

- After you grant permission, for O365 users can see SPP web app on the menu list (ALL). You can pin it as your personalized menu by simply click the **dots button** > **Pin to home** / **Unpin from home**.

- To revoke the access for this web app, O365 user can simply go to Office365 Settings:

Choose **App Permission** > **Remove SPP web app**.

\*If you removed this app, you will need to grant permission again after successfully login Okta.

4. For Sign Out, it will log you out from Okta SSO, simply click Sign Out button on top right corner to sign out.

You are completely signed out after you see this screen as below:
